The U.S. lift Truck division stationed in Cleveland has a skilled team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

In the beginning the home-based lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled lift trucks as part of a domestic equipment expansion venture. Product sales of these products were originally targeted to state-run companies, large scale corporations, and the armed forces. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical training became the new focus for enhancing quality and product development.

Home-based lift truck trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a position of substantial expansion of their lift truck operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the very competitive North American materials handling market. This joint-venture proved highly successful for Daewoo and their lift truck sales expanded greatly. In 1984, the company finished development of a new facility to help in manufacturing high end value-added products for export. In 1993, the company had a international sales network and started exporting designs they had developed through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into overseas markets.
